Summary

Full-stack software developer with a background in Software Engineering (Universidad Técnica Nacional, 2023-2026). Hands-on experience building features with Laravel (PHP) and MySQL in a business environment, and a full-stack management system with Angular, TypeScript and Prisma ORM as a personal project. Proficient in C#, Java, PHP and Python, with experience building and consuming REST APIs. Focused on clean code, agile teamwork and continuous learning to solve real-world problems.

Technical Skills

- **Languages:** PHP, JavaScript, TypeScript, C#, Java, Python
- **Frameworks & libraries:** Laravel, Blade, Angular, React, .NET (C#), Node.js, Bootstrap
- **Databases & ORM:** MySQL, SQL Server, Prisma ORM
- **Tools & methodologies:** Git/GitHub, REST API development, Power BI, Agile methodologies

Professional Experience

Full-Stack Software Developer (Professional Internship) | Pastas Roma | May 2026 – August 2026

- Digitalized sales department processes, especially the promotion request workflow, by developing Laravel (PHP) and MySQL modules that streamlined data entry and retrieval.
- Improved the user interface with Blade and Bootstrap, simplifying day-to-day operations for staff.
- Performed functional testing and debugging to ensure application stability in a production environment.
- Worked in an agile IT team, communicating constantly and meeting all established deadlines.

Projects

Auto Repair Shop Management System | Angular, TypeScript, Prisma ORM, MySQL |
August 2025 - December 2025

Full-stack application for end-to-end management of an auto repair shop: vehicle registry, repair history and customer management in a local environment.

- Designed and implemented a relational data model with Prisma ORM and TypeScript, optimizing queries and relationships between customers, vehicles and work orders in MySQL.
- Built a dynamic, responsive Angular interface that lets mechanics view and update vehicle status in real time.
- Configured the system to run on a local network, keeping data available without relying on external Internet access.
- Implemented fast search and filtering that reduces the time needed to locate customer records.

Education

Bachelor's Degree in Software Engineering | Universidad Técnica Nacional (UTN),
Alajuela, Costa Rica | January 2023 - August 2026

Languages

- Spanish: native
- English: B2 Upper Intermediate, certified (EF SET 58/100, September 2026; Listening C1)
